FOR IMMEDIATE RELEASE

MHA ANNOUNCES RELEASE OF RXPERTISE 7.0

May 11, 2007 (Florham Park, NJ): Managed Health Care Associates, Inc. (MHA), the largest Alternate Site Group Purchasing Organization (GPO) in the country, today announced the immediate availability of RxPertise 7.0. RxPertise is the leading Medication Regimen Review (MRR) software for consultant pharmacists in the Long Term Care industry, enabling them to efficiently manage the utilization, outcomes, and reporting requirements for patients in skilled nursing, assisted living, and extended care facilities.

Gregory S. Thomas, Vice President of Information Technology for MHA commented, "With the release of RxPertise 7.0, we have completely re-engineered the database, report and graph engines making it the most robust version of RxPertise ever. In addition, new features such as the ability to interface with popular pharmacy management systems is an example of our ongoing commitment to making RxPertise the most comprehensive MRR software available in the market place."

Jay Loeper, Pharm.D, FASCP, RxPertise Product Manager and Director of Clinical Software Development for MHA stated, "RxPertise 7.0 is the culmination of a year-long project that we began once the software was acquired by MHA. This version provides the necessary architecture and features to make RxPertise ready for today's and tomorrow's consultant pharmacist."

RxPertise 7.0 has many enhanced capabilities, including:

- **Pharmacy Management Software Interface Capabilities** - With version 7.0, resident demographic and medication orders may be imported from the following LTC pharmacy software systems: QS/1's NRx, Rescot's LTCP, RNA's Eagle System and Softwriter's FrameworkLTC.
- **New Database Engine** - Version 7.0 now utilizes Microsoft's SQL Server 2005 Express database engine. Very significant database performance will be noticed compared to previous versions.
- **Updated Graph Engine** - Version 7.0 uses the latest graph engine for fully-customizable graphs, to better illustrate your RxPertise data.
- **Updated SOM Tools** - Version 7.0 includes a new library of pre-phrased recommendations pertinent to the current State Operations Manual for skilled nursing facilities. Additionally, updated medication regulatory information is available (and customizable).
- **Updated Medications List** - Version 7.0 uses a complete medication listing to match up NDC level information from the pharmacy dispensing data. This list will be updated for you on a regular basis via our web site.
- **Prescription Drug Plan (PDP) Formulary Checker** - With version 7.0, users have complete access of all medications covered by your state's PDP based upon information provided by the Centers for Medicare and Medicaid Services (CMS). Coverage may be checked globally for the medication, or right down to the NDC level. Therapeutic alternatives may also be quickly viewed and users can update state formulary data monthly via the RxPertise website.
- **Improved Reporting and Graphing Capabilities** - One-click printing of as many reports and graphs as you wish. Effortlessly export your report to Adobe® Acrobat PDF, Microsoft® Excel, and Microsoft® Word formats. Eighteen MRR reports, fourteen reference reports, thirty statistical studies, nine worksheets, seven resident-data assessments, and seventeen graphs are available. Extensive customization options are also available.

"Exceptional Service. Extraordinary People."

25-B Vreeland Road, Suite 300, P.O. Box 789, Florham Park, New Jersey 07932-0789

For a full list of all the new features in RxPertise 7.0 please visit the RxPertise website (<http://www.rxpertise.com>).
